NOTE: Following the federal regulation changes, in 2000 Kentucky changed Developmental Disabilities from ages 3 through 5 to include children ages 3 through 8, which accounts for the noticeable increase in the number of children identified in this category.

NOTE: In approximately 1995, the federal government allowed attention deficit disorders to be added to the Other Health Impairment category. Prior to that time, ADHD/ADD were not included as educational disabilities, thus accounts for the increase in the number of children in this category.

Note that ADD and ADHD are not separate categories.  
They are included within OHI.
